# SHOWCASE 360

Virtual showroom software

# Share plans, collaborate on changes and showcase great designs.

Send customers their designs, so that you can keep them excited with virtual designs they can explore at home. You can also inspire new customers with a virtual showroom on your website that showcases your fantastic designs in 3D.

## How it helps you

### CONSTANT CUSTOMER CONTACT

Keep customers engaged and excited by sending them a virtual version of their latest designs to explore at home. Communicate changes and updates on the go and empower them to purchase without the need for them to come back into store. All within one simple, web-based solution that doesn't need an app to work.

### REMOVE BUYER DOUBT

Ease the worries of customers by giving them a way to experience their new designs in a virtual world. Using VR headsets, lead them through a virtual version of their room so they can better picture the reality of their new kitchen or bathroom and move closer to buying.

### VIRTUAL SHOWROOM

Inspire and attract new customers by showcasing your amazing designs in 360 views on your website. Quickly build new showrooms of the latest catalogues that customers can explore in store or online, allowing you to keep on trend without frequent – and costly – shop refits.

### GET NEW CUSTOMERS

Generate new customers using the ones you already have. Current customers can share the fantastic new designs you create for them with their friends and family, creating a great way to get recommended. You can even give customers branded VR headset to spread your brand even further.

#### **SHOWCASE**

*Create a VR experience in-store for your customers*

#### **INSPIRE**

*Inspire new customers with your designs displayed on your website*

#### **ORDER**

*Confirm deals quicker with customers without them needing to visit the store*

#### **COLLABORATE**

*Message and change designs on the go via the secure web portal*

#### **SHARE**

*Customers can upload and share designs direct to social media*

## **TWO LEVELS TO CHOOSE FROM**

### **COLLABORATE**

1-2-1 communication with your customers. Share designs with your customers for them to explore at home in 3D and reach agreements faster with real-time messaging.

### **INSPIRE**

Create a virtual showroom of your designs to inspire new customers. Directly upload all of your best designs to your website, with 3D images allowing customers to explore what you can do for them.

## Why Showcase 360 stands apart

### **DIRECT INTEGRATION**

It's quick and easy to share your fantastic designs by directly uploading them from Winner Design or Innoplus. You can use all your projects which you created in Winner Design/Innoplus and saved to the Cloud: upload your selection of designs without recopying images or the need of a communication agency.

### **SUPPORT BY LOCAL EXPERTS**

Get an award-winning level of support from experts in the software available at the end of the phone in just three rings.

### **KITCHEN AND BATHROOM RETAIL EXPERTS**

Workflows and processes are designed specifically for kitchen retailers, so that you don't have to spend the time and money on adapting other technology to suit your needs.
