SimpliPlan

Why SimpliPlan stands apart

REDUCE REMEDIAL BILLS

Install exactly what your customer is expecting and ensure that all materials and quantities are correct, with a parts list, elevations and tiling plan all created as you design. This will reduce incorrect orders, wastage and your remedial bill, improving your overall profit per sale.

GROW YOUR BUSINESS WITH AFFORDABLE SOFTWARE

One cost includes all features and access to all supplier catalogues. Priced at a similar cost to a new mobile phone contract, there are no hidden fees or surprises, allowing you to sell more, for less.

DESIGN GALLERY

Create stunning designs in less than 20 minutes thanks to a host of automated tasks that take the effort out of bringing your customer's vision to life and enable you to win more bathroom installations and grow your business.

How it helps you

BATHROOM DESIGN FOR THE NON-DESIGNER

Get started straight away without any training on any device you choose. There is no need to be a software expert, as the intuitive tool guides you through from room construction to tiling and furniture positioning. Simply create a room in a few clicks and drag and drop everything into place to quickly create a photo-realistic design.

DESIGN ONSITE WITH YOUR CUSTOMER

Using a touchscreen tablet, you can bring your customer's ideal bathroom to life in their own home with the flexibility to finish the design off later at home or in the office using your PC or Mac. Simple and quick plans can be created and instantly turned into 3D images using any tablet device, allowing you to provide reassurance to customers on what their final bathroom will look like as well as gaining a professional edge over your competition.

SELL 9/10 BATHROOMS

Being able to see their future bathroom increases customer trust that you can make their dream bathroom become a reality. Creating realistic 3D images of their bathroom in minutes provides that reassurance and has proven to sell 9 out of 10 planned bathrooms. With professional designs, you can increase your credibility and speed up the selling process by getting the plans right first time.

INSTALL WITH PRECISION

Laser rangefinders send room measurements to create the room layout accurately, ensuring that your room plans are exact from the start. As you create the plan, accurate installation plans are created automatically, such as tile cutting plans, parts lists and elevations, providing assurance that installation will be correct first time.

Do we have your brands?

We have one of the widest selections of UK and European brands in the industry. Get in touch to make sure we have yours – compusoft.group/bath-catalogues

Sell more bathrooms with design software that quickly brings your customer's dream bathroom to life in 3D.

9/10
SALES CONVERT

50%
QUICKER TO PLAN
THAN COMPETITORS

“Many customers pay attention to little things that have nothing to do with the actual bathroom planning. The little familiar details make the bathroom much more personal. It’s no longer just any bathroom, but your bathroom - and that makes selling easier.”

These take time but we have a very high completion rate: we sell 9 out of 10 planned bathrooms.”

ULRIKE WIMMER, WIMMER HEATING AND BATH GMBH

“A major advantage is that I can precisely define the customer’s requirements. With the 3D planning, I can immediately compare whether the customer has imagined something different.

So now I don’t have any subsequent discussions or improvements. I can also give the planning to my fitters, who can see material changes precisely and don’t have to ask.”

PETER KLETECKA, KLETECKA GMBH, ROSENAU
