Winner *Flex*

Design, Showcase, Quote,
& Order from anywhere.

Grow your kitchen business with Winner

WORK REMOTELY

Work on the same designs in the office, at home or at your customer's home for the onsite survey, knowing that your projects, customer details, catalogues and settings all updated directly to the cloud for you to access from anywhere. With licences tied to the user and not a computer, you have the ultimate flexibility to work anywhere.

DESIGN EASILY

Bring your customer's dream kitchen to life in front of their eyes, with a design tool so user-friendly you can create stunning designs in less than 20 minutes. Rooms can be quickly drawn in, with doors and windows dropped into walls or even onto sloping ceilings. A host of automated tasks take the effort out of designing. Plinths and worktops to flow round the cabinets automatically to save time. You can even respond quickly to a customer's changes. Different model to suit a different budget or need to see a new colour? No problem. It's all done with the click of a button with no need to rebuild from scratch.

SHOWCASE BRILLIANTLY

Our photo-realistic 3D images bring your designs to life, to help your customers step inside their dream kitchen for that wow moment. The 360° view of the room invites the customer to explore their kitchen as if they were really there, helping to secure the deal. And this can be created in a few minutes, not several hours, so that you can keep customers with you as you design.

QUOTE ACCURATELY

Quote with certainty. Prices of every product are up-to-date and 100% accurate. Costs are calculated as you design, so that you can see them in a click of a button. You can even check the margin as you go, so that you know how every sale impacts your profit. Reminders for easily missed elements, such as worktops and plinths are there to make sure that you don't miss a thing in your quote and order, eliminating easy mistakes that have a big impact.

ORDER SEAMLESSLY

As you design, the fitting plans and technical order details are created in the background, so the moment you close a deal you are ready to order. This integration saves time and avoids costly errors, as no details from your design are lost. And thanks to our expert data team and close relationships with manufacturers, the whole process is seamless and accurate.

MANAGE PRECISELY

One configurable dashboard gives you a single view of how your business is performing. See detailed reports of your shops and salespeople vs the previous period in real-time to improve your performance and achieve your goals.

Design, showcase, quote and order in minutes, not hours from anywhere you are with Winner *Flex*.

Bring your customer's dreams to life in less than 20 minutes with one solution that can take you from design through to quotation and order quickly and easily with one online platform.

Backed by an extremely accurate and extensive catalogue database, you can be sure that every design, quote and order is exact, so that you can deliver on the designs you sell.

Get the flexibility to work from anywhere and see everything that is happening in your business with Winner *Flex*.

Why Winner stands apart

1. CLOUD-ENABLED SOFTWARE TO DESIGN AND MANAGE YOUR BUSINESS FROM ANYWHERE

Winner is now securely connected to the cloud through our new online *Flex* platform meaning all your data is backed-up in one secure cloud platform and can be accessed from anywhere.

2. ACCURATE CATALOGUE DATA

Unmatched by anyone else, our data is not just up-to-date and accurate but also enriched with images, links and details that make your lives easier. This extensive catalogue database is combined with exact data and underpins every part of Winner Design, so that you can be sure every design, quote and order are right first time.

3. SUPPORT BY LOCAL EXPERTS

Receive full training right from the start, so that you can get the most out of your software. Local support is always available, with experts on call within three phone rings, ready to solve your queries in just one call.

4. INTEGRATED SOLUTIONS

One integrated system to design, showcase, quote and order. Streamlining the design-to-order process, saves you – and your customers – time and reduces the risk of costly mistakes.

Do we have your brands?

We have the widest selections of brands in the industry.

W

Winner *Flex*

“Winner is the perfect kitchen design tool, as it offers a CAD package that is able to manage a project from the initial room survey and design through to a fully specified, coded and costed order with beautiful presentation renders.”

DAVID KNAGGS, PRE-PRODUCTION MANAGER
CALLERTON

“Our partnership allows our customers to quickly and accurately design, promote and sell kitchens, confident that the catalogues are updated with the latest products and features, without unnecessary delays”

STEVE TOUGH, COMMERCIAL SALES DIRECTOR
MASTERCLASS KITCHENS
